EXPERIENCE

SOFTWARE ENGINEER QTRAC.
Jan 2021 – August 2024

Development using Angular, NestJs, and .Net to build features that implemented Azure functions, SingalR communication. Created and expanded existing APIs and data models as the product matured to meet the needs of existing and incoming clients. Documenting APIs with swagger implementations. Provided training and support to the QA and onboarding teams of newly created features. Wrote tailored python scripts to generate client reports from our database, that became the foundation of the reporting system that was built into the product.

SOFTWARE ENGINEER RENAU ELECTRONIC LABS
Sep 2017- Dec 2020

Developed full stack solutions using device hosted MEAN stack applications along with Ionic V1 to provide a web facing, and mobile application to manage and monitor physical hardware via MQTT protocols.

CRM ADMINISTRATOR LIDO ADVISORS LLC
